

# **National Retail Chain – Multi-Site Surveillance & Network Deployment**

## **Executive Summary**

Systembuilders delivered a standardized, multi-site surveillance and network deployment for a national retail client.

## **Full Project Scope**

- IP surveillance cameras
- Centralized video recording
- Network switching and PoE infrastructure
- Remote monitoring readiness

## **Standardized Architecture**

A repeatable system architecture was developed to ensure consistent performance across all locations.

## **Centralized Management**

Systems were designed to support centralized monitoring, analytics integration, and simplified maintenance.

## **Operational Outcome**

The client achieved improved loss prevention, visibility, and operational control nationwide.
