Corporate Offices – Enterprise Collaboration & AV Systems

Executive Summary

Systembuilders delivered enterprise collaboration and AV systems for corporate office environments.

Full Project Scope

• Conference room AV design

• Displays, cameras, and microphones

• BYOD connectivity

• Structured cabling and control systems

User Experience Design

Rooms were designed to provide intuitive operation, executive-level presentation quality, and seamless hybrid collaboration.

Deployment & Training

Systems were installed, tested, and supported with user training and documentation.

Business Outcome

The organization gained modern collaboration spaces supporting productivity and growth.
