

Education Campus – Surveillance & Network Optimization

Executive Summary

Systembuilders delivered a large-scale surveillance and network optimization project for an education campus.

Full Project Scope

- IP camera deployment
- Recorder consolidation
- Network optimization
- Structured cabling upgrades

System Optimization

Legacy systems were consolidated to improve performance, reliability, and manageability.

Security Coverage

Campus-wide surveillance coverage enhanced safety and operational awareness.

Operational Outcome

The institution achieved reliable security systems aligned with modern network performance standards.
